DETAILED ACTION

Claims 51-67 are pending in this application.

Action Summary

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.
2. Examiner acknowledges the cancellation of claims 36-50.

Allowable Subject Matter

3. The indicated allowability of claims 51-67 is withdrawn in view of the newly discovered reference(s) to US Patent Number 3,458,623. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 51-67 are rejected under 35 U.S.C. 102(b) as being anticipated by Raymond (US Pat. No. 3,458,623).

Raymond teaches an encapsulating iron-containing composition (see abstract).

Column 1, lines 24-27 teach the types of iron which may be employed; lines 53-72

Art Unit: 1616

teach that the coating is at least one of a monoglyceride or a diglyceride. Column 2, lines 3-5 teach the particle size is no more than about 75 microns and lines 44-46 teach that the composition may also contain other additives such as flavoring agents, dyes and the like. Column 2, lines 49-51 teach that the iron-containing formulation to be used in tablets, capsules, elixirs and the like, for example iron-fortified multivitamin tablets. Column 3, lines 5-9 teach a multivitamin formulation comprising in addition to the encapsulated iron, vitamin A.

Conclusion

5. Claims 51-67 stand rejected.
